

Multi Media

This class engages students critical thought and awareness about what multimedia is and the role it plays in our lives. Students will develop both their communication and technical digital skills while exploring themes of process, perception, authenticity and persuasion.

The course is divided into the units:

DIGITAL IMAGING

ANIMATION

SOUND

COMPUTER CODE PROGRAMMING

They will learn through problem solving, critical and creative thinking about technology and the role it plays in our lives. Students will explore multimedia by looking at themes of function, perception, authenticity and persuasion. Lessons will build on learning to look ahead to skills that may be needed in the future.

Assessment will be based on: Computer and hands on assignments, research, planning, group and individual projects, presentations, reflective exercises, work ethic & attitude.

Projects are divided into the following categories:

Small projects 25%, Unit Projects 35%,

Collaborative Projects 20% Final Project 20%

Multimedia will help students learn in:

Communication

Problem Solving

Technological Competence

Personal Development

Creative Expression

Citizenship
